A Review of PET Imaging for Recurrent Prostate Cancer

I'll comment in a separate post on where my head is at after receiving my latest PSA results.

December 9, 2018 By Dan Zeller

This is a quite informative paper from Practical Radiation Oncology, giving a good overview of the newer imaging technologies being developed to identify the location of recurrent prostate cancer before beginning salvage radiation therapy.

Prostate cancer–specific PET radiotracers: A review on the clinical utility in recurrent disease

I'll comment in a separate post on where my head is at after receiving my latest PSA results.
