

Over \$80,000 Raised for Lung Cancer Research!

You can still donate for the next round of funding projects

May 29, 2024 By [Dann Wonser](#)

Friends and Family,

The results are in, and our lung cancer research fundraiser was far more successful than I could have ever imagined. Including the matching donation from our anonymous donor, 158 people contributed. We raised \$40,200!

And I can't thank Sally Rudney's family, who supported the Sally Rudney Memorial Fund. THEY HAVE MATCHED OUR ENTIRE DONATION, dollar-for-dollar. That means that together, we raised \$80,400 for lung cancer research!

The amount puts the EGFR Resisters over the fundraising goal of \$400,000, which is enough to fund two more research grants that benefit people with the EGFR mutation, like me.

You can still donate for the next round of funding projects, and your donation will be doubled until the Sally Rudney Memorial Fund has been successfully depleted. Here's the link:

<https://fundraise.lungevity.org/index.cfm?fuseaction=donordrive.personalCampaign&participantID=73342>

Thank you to everyone who contributed to this amazing project. You are making a difference!

Love,

Dann
